SBX 60/70

SB 60/50

SB 835

SBX Rio, SBX Lido, SBX Vision, SBX Trigon, SB

- **Use of appropriate tools** – Use only appropriate tools when assembling the cabinet, such as the included Allen key and a suitable screwdriver (not included). Ensure that the screwdriver is the correct size for the screws to prevent damage. Do not use a power screwdriver, as screws can easily be over-tightened, potentially damaging the material.
- **Work in a safe environment** – Assemble the cabinet on a level and stable surface. Ensure the workspace is well-lit to avoid accidents or mishandling.
- **Hazard from sharp edges** – Avoid contact with sharp edges and corners of the parts. If necessary, wear work gloves to prevent cuts.
- **Avoid pinching injuries** – During assembly, ensure your fingers do not get caught between parts to avoid pinching or injury. Work slowly and carefully.
- **Securing parts** – Ensure that all screws are tight but not over-tightened to avoid damaging the material. After assembly, check that the cabinet is stable and secure.
- **Safe handling of heavy parts** – Some parts of the cabinet may be heavy. It is recommended to assemble the cabinet with at least two people to minimize the risk of injury from lifting heavy loads.
- **Pay attention to body posture** – Maintain an ergonomic posture during assembly to avoid back and joint injuries. Avoid prolonged bending or excessive stretching.
- **Cabinet load capacity** – The cabinet is intended solely for holding an aquarium and accessories. Be careful not to exceed the maximum load capacity of the cabinet to avoid structural overload.
- **Keep children away during assembly** – Keep children and pets away during assembly to prevent injuries from falling parts or tools.
- **Children should not play with the cabinet** – Children should not use the cabinet as a climbing frame or play object. Improper use may result in injuries or damage.
- **Post-assembly inspection** – After assembly, check all connections for tightness and stability before placing the aquarium on the cabinet. Ensure that the cabinet is level.
